

U.S. Cup Challenge

This race is hoping to pit the best of United States (and for this race only our British cousins will get an honorary American Citizenship) & British Iron against the best the Continent can offer us.

I am hoping to see Ford Mustangs & Falcons with Chevy Camaro & Corvette and the occasional Dodge or American Motors or perhaps even a Corvair Stinger, along with an Aston or Jaguar showing the boys from Germany, Italy and perhaps France what their brake lights look like!

We will be awarding 4 trophies in this group - 1st and 2nd overall and then two trophies to be awarded after careful study of the placement of the moon and stars and other arcane and mystic measures.

So come out and show the crowd what big ground shaking cars can do.
